

LockedIn

"Stay locked in all the time" 🔒🔥

Your all-in-one training companion that actually gets it. Smart nutrition tracking, a gym logger that doesn't waste your time between sets, and an AI coach that runs entirely on your phone. No subscriptions, no cloud, no compromises.

Eat Smarter, Not Harder

Nutrition that adapts to you

Tell it your goal, and it builds your day. Smart calorie budgets, automatic macro splits, and a 1-tap food logger so you can track lunch in 3 seconds. Craving something? The AI whips up a recipe from whatever's in your fridge.

Log Sets, Not Sentences

Built for sweaty hands and short rest times

No more typing "80" on a tiny keyboard mid-set. Just tap + or - to adjust weight and reps. It remembers what you lifted last time, counts your rest for you, and gets out of the way. Forgot to start the timer? Set the duration manually after.

Bench Press (Barbell)			🕒 Rest: 01:24
Set 1	80.0 kg	8 reps	✓ Done
Set 2	82.5 kg	6 reps	Pending

Your Coach Lives On Your Phone

Runs locally, no internet needed, no data leaves your device

A real AI coach that knows your sport, whether you're training for football, tennis, MMA, or just trying to get stronger. It reads your logs, spots gaps in your nutrition, and gives you honest advice. All running on your phone's hardware, not someone's cloud server.

COACH LOCK • ANSWERED IN 0.4 SECONDS, ON-DEVICE

"You hit 140g protein today, 25g short of your target. A Greek yogurt before bed would close that gap and help your muscles recover overnight. Keep it up! 🍌"

Make Every Day Count

Small daily wins that build real habits

Three simple quests every day: hit the gym, reach your calories, log your meals. Finish all three and you're "100% Locked In." It sounds small, but that green checkmark at the end of the day? It hits different.

✓ 100% Locked In Today 3 / 3 Quests Completed 🔥 You crushed it

• HOW WE BUILT IT

We used AI coding agents to move fast, but every feature, every screen, every pixel was tested by a real person on a real phone. The AI wrote the code. We made sure it actually worked.

01

AI Writes the Code

We described what we wanted and the AI agent built it: components, logic, native Android config, all of it.

02

Instant Phone Preview

Every change showed up live on a Samsung Galaxy over Wi-Fi. No waiting, no reinstalling, just build and see.

03

We Tested Everything

Real fingers on real glass. We checked every button, every scroll, every edge case on actual hardware ourselves.

👤 HUMAN-VERIFIED

04

Ship a Real App

One command compiles a production Android APK. Custom icon, dark launch screen, ready to install and go.

FRONTENDReact 18 + Vite

STYLINGTailwind CSS 3

MOBILECapacitor 7

ON-DEVICE AILlama 3.2 3B (GPU)

FALLBACKGroq Cloud LPU

DATAStays on your phone

\$0

Per-User AI Cost

The AI coach runs on your own hardware. No API bills, no per-query charges, works the same at 10 users or 10,000.

100%

Your Data, Your Phone

Health data, body metrics, workout history, none of it ever leaves the device. Privacy by design, not by promise.

<0.5s

Instant AI Answers

No loading spinners waiting for a server. The coach responds in under half a second because it's right there on your phone.
